

7th pipeline Cosmos Database → azure data factory → azure blob storage

Pipeline Architecture :

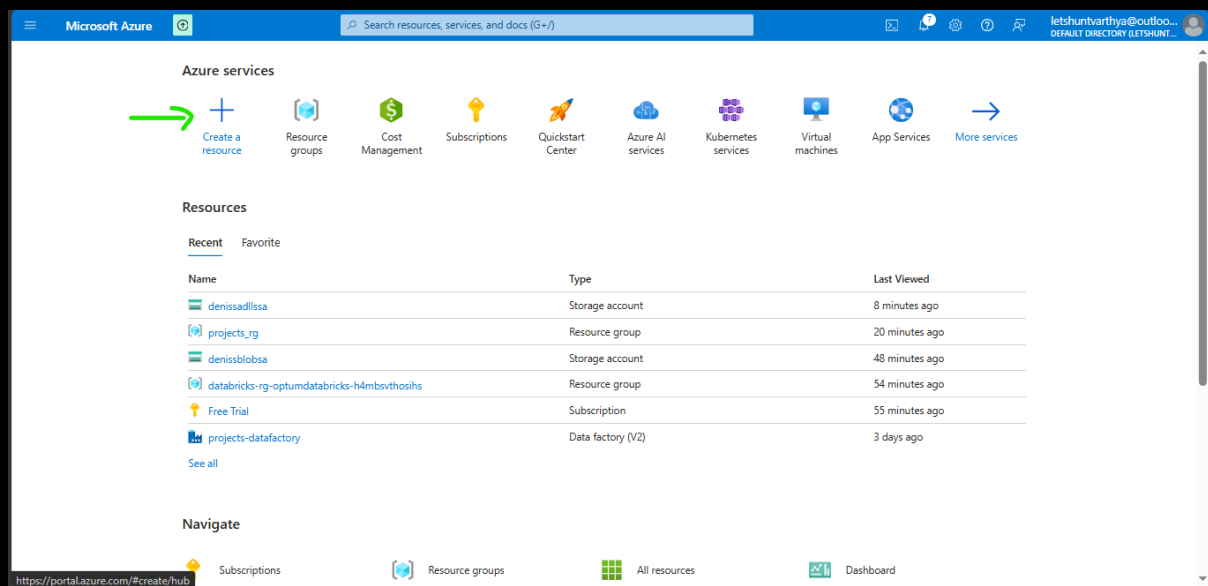

Services Required :

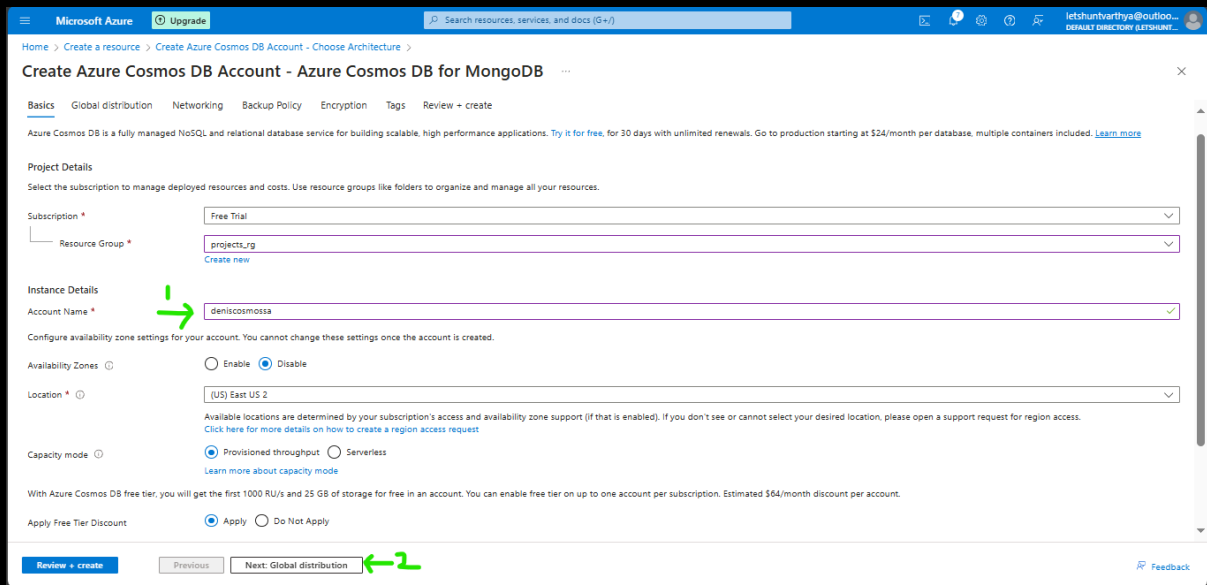

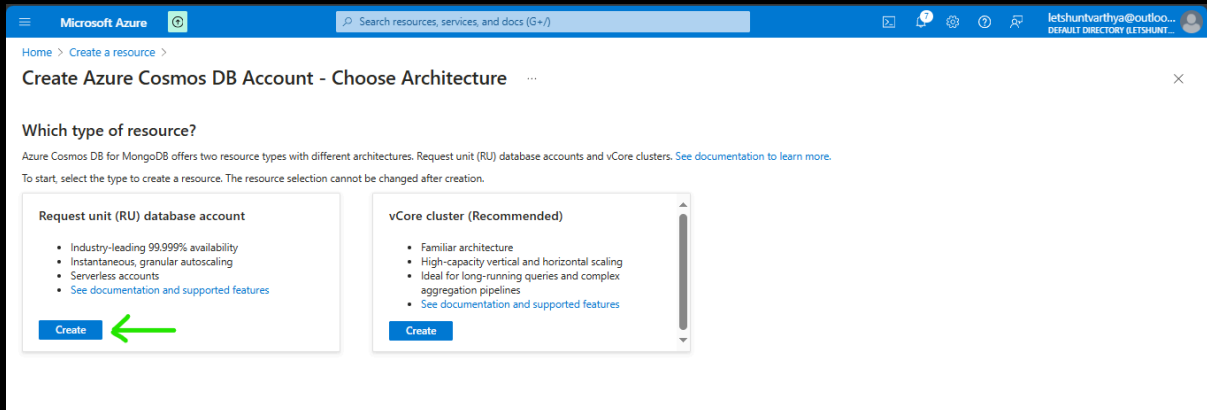

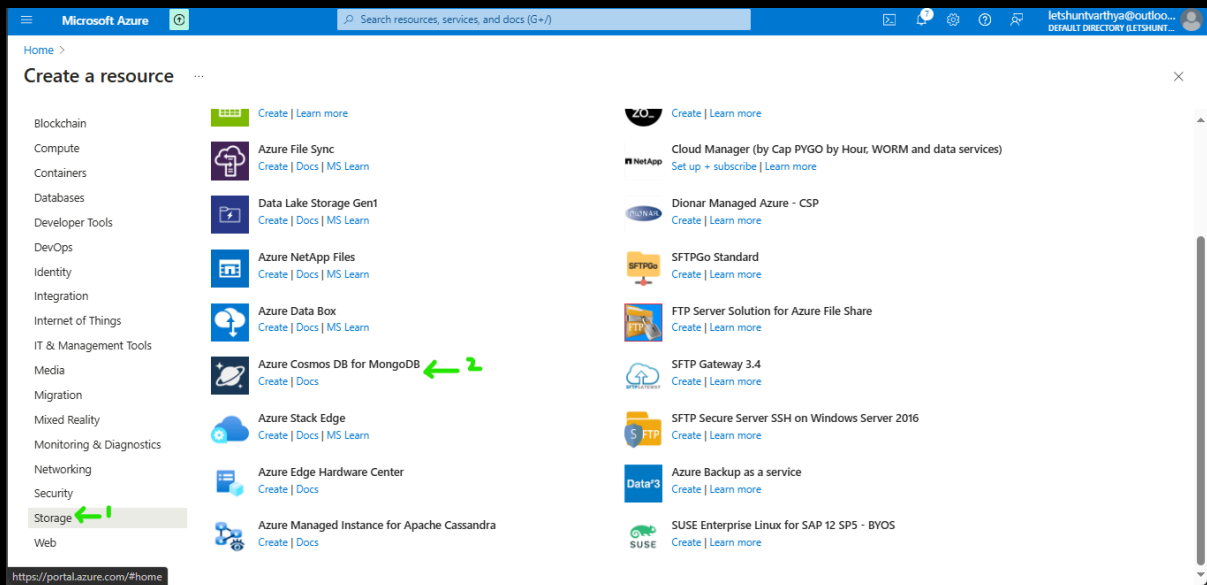

1. On prem mysql
2. Azure data factory
3. Azure blob storage

Azure Blob Storage Creation :

- Creation of an azure blob storage is shown in the document below.
- <https://docs.google.com/document/d/1vZCMfM9ieALTQm6Jdwl2JzxcMkwnyvkSJHCrry2kVlo/edit?usp=sharing>
- Create a container called denisdata.

Azure Cosmos DB for Mongo DB creation :

Create Azure Cosmos DB Account - Azure Cosmos DB for MongoDB

Basics Global distribution Networking **Backup Policy** Encryption Tags Review + create

Azure Cosmos DB provides three different backup policies. You will not be able to switch to Periodic mode once you adopt Continuous mode. [Learn more](#) about the differences of the backup policies and pricing details.

Backup policy ☒ Periodic
Backup is taken at periodic interval based on your configuration

☐ Continuous (7 days)
Provides backup window of 7 days / 168 hours and you can restore to any point of time within the window. This mode is available for free.

☐ Continuous (30 days)
Provides backup window of 30 days / 720 hours and you can restore to any point of time within the window. This mode has cost impact.

Backup interval

240

Minute(s)

60-1440

Create Azure Cosmos DB Account - Azure Cosmos DB for MongoDB

Basics Global distribution Networking Backup Policy **Encryption** Tags Review + create

Data Encryption

Azure Cosmos DB encryption protects your data at rest by seamlessly encrypting your data as it's written in our datacenters, and automatically decrypting it for you as you access it.

By default your Azure Cosmos DB account is encrypted at rest using service-managed keys. At the moment, you will not be able to switch back to service-managed key after opting into using custom-managed key while creating your account. [Learn More](#)

Data Encryption *

☒ Service-managed key

☐ Customer-managed key (CMK)
